

Rimas Kapeskas

President
Clean Cold Power

Rimas Kapeskas, a transportation industry veteran, is President of Clean Cold Power, maker of a disruptive transport refrigeration technology that delivers a cost-effective zero-emission transport refrigeration unit (TRU) that is cleaner, quieter, and more efficient than diesel and other alternative technologies.

Prior to joining Clean Cold Power in 2020, Kapeskas spent 25+ years on the UPS corporate staff, serving as Strategy Vice President and Managing Director of their Strategic Enterprise Fund. The Strategic Enterprise Fund is corporate venture capital unit that invested in early to mid-stage start-up technology companies strategically relevant to the global transportation and logistics firm. He also directed research and development efforts for launching new business units, diversified service offerings, and new support technologies. Kapeskas held several operating, sales and marketing roles, including integrating acquired companies and new technologies in over 20 countries during his career. He also is an operating partner with Cambridge Capital and serves on boards of multiple private companies and non-profits.
